Arvie Jay Mariano Camba

Full-Stack Web Developer | Laravel, Vue.js, AI-Assisted (Agentic) Development
Caloocan City, Philippines | ajmcamba@gmail.com | bit.ly/AJMCGithub | bit.ly/AJMCLinkedIn

Professional Summary

Full-Stack Web Developer with 3+ years building and maintaining production systems, promoted to mid-level in 2025. Main developer on Department of Justice systems, including an online prosecutor clearance platform now in government use, and on other government projects for Quezon City and public pension services. Leads OJT trainees on local government platforms and helps interview new interns. Picks up whatever stack a project or team uses and ships within it.

Core stack: TypeScript | Vue.js | Nuxt.js (SSR) | React.js | Laravel | RESTful APIs | Supabase | Tailwind CSS | Agentic AI (Claude Code, MCP)

Technical Skills

- **Backend:** PHP, Laravel, RESTful APIs, Laravel Sanctum, JWT, RBAC, Supabase, third-party API integration, PDF generation, payment integration
- **Frontend:** JavaScript, TypeScript, Vue.js, Nuxt.js (SSR), React.js, Alpine.js, Pinia, jQuery, Tailwind CSS, Bootstrap, PWA
- **Database:** MySQL, schema design, migrations, query optimization, data migration
- **AI and Agentic Development:** Claude Code, MCP servers, custom agent skills, subagents, hooks, AI-assisted code review, testing and debugging
- **Tools and Practices:** Git, GitHub, Postman, Trello, Agile/Scrum, UAT and staging support, code review, Kotlin (mobile features)

Professional Experience

Software Developer (Mid-Level since 2025)

Ayahtek Inc., Philippines | March 2023 - Present

- Develop and maintain 15 production web applications for government agencies and private clients in an Agile/Scrum team.
- Design MySQL schemas and migrations, and build Laravel RESTful APIs with Sanctum or JWT authentication.
- Integrate APIs with Vue.js, Nuxt.js, React.js, Alpine.js and jQuery frontends, and external services such as Quezon City E-Services.
- Enforce role-based access control with Laravel middleware; debug production issues and deliver new features.
- Support UAT and staging releases and security reviews; lead OJT trainees by assigning modules and reviewing their code.

AI-Assisted (Agentic) Development

- Configured Claude Code with CLAUDE.md rules, command permissions (.env blocked), Laravel Pint hooks, MCP servers and custom skills.
- Keep persistent project memory and a codebase knowledge graph (Graphify) so agents work from accurate context.
- Use AI agents to review diffs, write tests and trace bugs to the root cause; every change is reviewed and tested before release.

Selected Projects

Government Systems

Online Clearance Application System (OPCAS) | *Office of the City Prosecutor, Quezon City* | *Main Developer* | *Laravel, jQuery, MySQL, JWT*

- BSIT thesis turned public system, in use by the Quezon City Prosecutor's Office since July 2026.
- Built the database, API and frontend for applications, case record checking, PDF certificates and tracking, with Quezon City E-Services sign-in.

Case Monitoring System | *Office of the City Prosecutor* | *Main Developer* | *Laravel, Alpine.js, MySQL, JWT*

- Built case records, reports, automatic case aging and motion for reconsideration workflows for prosecutors and staff.

LGU360 and Barangay Services Platforms | *Local Government* | *Backend, Database, UI* | *Laravel, Vue.js, TypeScript, MySQL, Laravel Sanctum*

- Built certificate applications, requests, incident reports and case tracking; LGU360 is configurable for other cities.

Police Retirement, Pension and Duty Attendance Systems | *Government (Police)* | *Maintenance, Features* | *Laravel, Kotlin*

- Fixed bugs and added features on live retirement-claim and pensioner systems, and delivered features on the duty attendance Android app.

HR and Payroll

Human Resources Management System (HRMS) | *Main Developer* | *Laravel, React.js, MySQL, Laravel Sanctum*

- Built attendance clock-in/clock-out, payroll processing and leave request workflows for multiple companies.
- Payroll follows Philippine rules for government deductions, overtime, night differential and holidays; loan interest and clock-in options follow each company's settings.
- Role-based access control limits each user to their own records; the mobile app signs in with an MPIN.

Other systems: Pet Hotel Booking Platform (Nuxt.js SSR, multi-branch), Mental Health Appointment Platform, Centralized Login and Access Control, Loan Application Platform (PWA), Custom Song Ordering Platform, Course Scheduling Platform (Supabase), Influencer Engagement Prototype (React.js).

Education

Bachelor of Science in Information Technology | New Era University | 2018 - 2023
