

Arvie Jay Mariano Camba

Full-Stack Web Developer | Laravel, Vue.js, AI-Assisted (Agentic) Development

Professional Summary

Full-Stack Web Developer with 3+ years building and maintaining production systems, promoted to mid-level in 2025. Main developer on Department of Justice systems, including an online prosecutor clearance platform now in government use, and on other government projects for Quezon City and public pension services. Leads OJT trainees on local government platforms and helps interview new interns. Picks up whatever stack a project or team uses and ships within it.

Professional Experience

Software Developer (Mid-Level since 2025)

Ayahtek Inc., Philippines | March 2023 - Present

- Develop and maintain 15 production web applications for government agencies and private clients in an Agile/Scrum team.
- Design MySQL schemas and build Laravel RESTful APIs with Sanctum or JWT authentication and role-based access control.
- Integrate APIs with Vue.js, Nuxt.js, React.js and Alpine.js frontends and external services such as Quezon City E-Services.
- Support UAT and staging releases and security reviews; lead OJT trainees by assigning modules and reviewing their code.
- Run an agentic Claude Code workflow: CLAUDE.md rules, guarded permissions, Laravel Pint hooks, MCP servers, custom skills and AI-assisted code review and testing.

Selected Projects

GOVERNMENT SYSTEMS

- **Online Clearance Application System (OPCAS)**, Main Developer (Laravel, jQuery, MySQL, JWT): BSIT thesis turned public system, in use by the Quezon City Prosecutor's Office since July 2026; online applications, case record checking, PDF certificates and E-Services sign-in.
- **Case Monitoring System**, Main Developer (Laravel, Alpine.js, MySQL): case records, reports, automatic case aging and motion for reconsideration workflows for prosecutors.
- **LGU360 and Barangay Services**, Backend and Database (Laravel, Vue.js, TypeScript): certificate applications, incident reports and case tracking, configurable for other cities.
- **Police Retirement, Pension and Duty Attendance Systems** (Laravel, Kotlin): bug fixes and new features on live systems and an Android app.

HR AND PAYROLL

- **Human Resources Management System (HRMS)**, Main Developer (Laravel, React.js, MySQL, Sanctum): attendance, payroll and leave workflows; payroll follows Philippine rules for government deductions, overtime, night differential and holidays.

Other systems: Pet Hotel Booking (Nuxt.js SSR), Mental Health Appointments, Loan Application (PWA), Course Scheduling (Supabase) and more.

Education

Bachelor of Science in Information Technology

New Era University | 2018 - 2023
